About

Coco peat is made of natural fiber constituents of coconut husk which is a finely compressed, chemical-free and natural growing medium which acts as a soil substitute or a supporting medium to nourish the soil. It is an ideal soil substitute and is widely used in Decorative Gardens, Eco friendly walls, Potter Plants, Seed Raising, Seedling etc. It is widely used with potted plants & also it is one of the best media for seed germination.

Benefits

- It restores water content of plants and allows air circulation for good germination.
- Improves aeration in the soil for optimal root growth.
- Maintains the moisture for longer duration, hence less watering required.

Seed Germination

All type of vegetables folower & Herbs seeds can be germinated in cooc peat powder. Powdered form of coco peatis soft , retains moisture, allow aeration for optimal germination. It's 100% Organic powder.
